Cover Letter: Software Engineer (Entry level candidates welcome) - DSC/EZ

ST Engineering Mission Software & Services Pte Ltd Singapore 2026-08-10

I am applying for Software Engineer (Entry level candidates welcome) - DSC/EZ at ST Engineering Mission Software & Services Pte Ltd in Singapore. Your team's focus on shipping reliable software at scale is where I contribute best. I build across web, mobile, database and custom software with testing rigor and API integration.

I am an NUS Information Systems graduate and Ngee Ann Polytechnic IT (N54) — CSIT Diploma Scholar and Director's List — across Web Design and Development, Database Development, Custom Software and Application Development, Software Testing and Mobile Application Development. I authored a whitepaper on internal and shadow APIs (API design, governance) at https://lnkd.in/gsCZca4B. I am based in Singapore, Mandarin and English, and available for on-site collaboration.

- **Authored internal and shadow API strategy,** whitepaper on discovery and governance for API-driven integrations
- **Built across web, mobile and database layers,** custom software from prototype to production with testing rigor
- **Recognised for breadth under CSIT scholarship,** CSIT Diploma Scholar and Director's List for Information Systems
- **Bilingual delivery in Singapore,** bridges Mandarin and English stakeholders

I will shape the problem with your engineers, ship a lean prototype that proves value for ST Engineering Mission Software & Services Pte Ltd, then harden it via API design, testing and iteration so it becomes a trusted tool in the daily workflow.

Based in Singapore and available at short notice. Tailored CV attached, without invented stack.
